TECHNOLOGY, SIMPLIFIED.

CASE STUDY:
MOUNT LAUREL TOWNSHIP

Mount Laurel Township, a municipality with a commitment to community safety, faced a pressing need to upgrade its access control system. The existing system was outdated, causing security vulnerabilities and operational inefficiencies.

Challenge

The outdated access control system posed significant security risks, with limited functionality and an inability to adapt to evolving security threats. Mount Laurel Township required a robust solution to enhance security measures and streamline access management across its facilities.

Solution

Rivell stepped in with a comprehensive solution, offering Mount Laurel Township a complete replacement of their access control system. Leveraging advanced technology and industry expertise, Rivell implemented a tailored solution to meet the township's specific security needs.

Results:

The new system significantly improved security measures, streamlined access management processes, and provided peace of mind knowing that facilities were adequately protected.
