

## CASE STUDY: BUTTACI LEARDI & WERNER

*Buttaci Leardi & Werner recognized the need to modernize their IT infrastructure to keep pace with evolving technology trends and enhance operational efficiency. Their on-premise workstations and servers posed challenges in terms of scalability, maintenance, and management.*

### Challenge

Maintaining on-premise workstations and servers presented Buttaci Leardi & Werner with various challenges, including high maintenance costs, limited scalability, and inefficient resource utilization. The firm sought a solution that would address these challenges while improving overall IT performance and reliability.

### Solution

Rivell proposed a migration to Microsoft Azure, leveraging the power of cloud technology to optimize Buttaci Leardi & Werner's IT infrastructure. Through meticulous planning, Rivell seamlessly migrated the firm's workstations and servers to the cloud, ensuring minimal disruptions to ongoing operations.

### **Results:**

***Cost savings were realized through reduced hardware and maintenance expenses, allowing the firm to allocate resources efficiently. Additionally, it improved collaboration and productivity among team members.***
